

AMBIMAT ELECTRONICS

Solving tomorrow's problems
today since 1982

Over the past 41 years Ambimat Electronics has been instrumental in providing solutions and services to various government organisations like ISRO, DRDO, PRL, IPR, Indian Army, Indian Air Force etc in hardware and software development for their challenges. Much before the 'Made in India' term was coined, Ambimat has indigenising solutions since inception.

Our Products and Services

We provide products ready to market as well as design, development, testing, supply chain, manufacturing, networking, cloud computing, and mobile application development services. Our expertise lies in the fact that with our experience we understand customer's challenges in its entirety and can provide a solution that uses a hardware – software co-design thinking.
